PREFACE

Special Publicotion 58 is o revised ond updoted version of the list of active mineral producers published in 1979 qs Speciol Publicotion 53. In this new version the doto ore orronged in three lists. One is simply o list of the *active mining companies* in Colifornio; the oddress of the compony is included in each entry. The other two ore differently orgonized lists of *active mines* in Colifornio: one lists the mines by commodity, the other by county of locotion. Eoch entry in these two lists includes the nome of the mine, its locotion by lotitude and longitude, ond the name and address of the owner-operotor. Each entry in the list of active mines by county includes the name of the commodity.

The intention of the compilers wos to enter all the minerol producers and mines octive in Colifornio ot the time the compilotion wos mode (early 1981). Lists maintoined by the U.S. Bureou of Mines, the Mine Sofety ond Health Administrotion, the Colifornio Occupotionol Safety ond Health Administration, the U.S. Forest Service, county plonners ond ossessors, ond vorious trode organizations, as well os telephone directories, were consulted. Severol formerly unlisted mines were identified by Division field geologists in the course of routine minerol resource projects. An ottempt wos mode to verify the reported informotion by telephone or personol field visits.

About 950 mines are listed in Speciol Publicotion 58. There moy be os many os 1,000 active mines in the stote. There ore probobly more thon 5,000 idle quorries, pits, ond underground mines, none of which ore included in this publicotion. Pits operoted intermittontly by the government ore not included.

Although every effort wos made to ensure the comprehensiveness of the lists, some operotions hove undoubtedly been overlooked. If your *active* mine is not listed, pleose fill out the simple form ot the bock of this booklet and mail it to: List of Producers, Colifornio Division of Mines and Geology, 610 Bercut Drive, Sacromento, Colifornio 95814. Your effort will be very much oppreciated.

EXPLANATORY NOTES

(1) In cases where the officiol compony nome for o mine is unknown or where the mine hos no nome, o nome based on the mine's geographical locotion hos been ossigned. This prevents the confusion thot would result from listing widely seporoted properties owned by one compony by the some compony name.

(2) Metol mines ore termed *mines.* Non-metol mines ore termed *quarries* or *pits.* Sand, gravel, ond cloy operotions ore *pits;* stone operotions ore *quarries.*

(3) Lotitude (LAT) ond longitude (LONG) locations ore thought to be occurote to obout ± 0.03°. Some entries were not field-checked for this publicotion.

(4) Mines thot produce construction ond industriol minerols ore listed only once, even though they neorly olwoys produce more thon one commodity. These mines ore listed under the commodity cotegory thot is the most importont for thot mine. Gold mines, for example, ore listed only once olthough they olwoys produce some silver. However, metal mines ore listed under more thon one commodity group when the production of on importont commodity would otherwise not be reflected in the mine lists.

(5) There are severol construction aggregote moteriols, each with its own physical specificotions. In this publication these oggregote moteriols hove been ossigned, on the basis of product-use ond quolity, to one of three cotegories, obbrevioted os follows: *PCCA* — portlond cement concrete oggregote; *ABM* — oggregote bose materiol, including ospholtic concrete oggregote; ond *ASM* — oggregate subbose materiol. PCCA is higher quolity moteriol thon ABM, which is higher quality materiol than ASM.

(6) Lime and cement plonts ore included in the list of mines by commodity because such plonts produce on importont monufoctured minerol product, even though they may not hove o raw moteriol source closeby. For example, portland cement is monufoctured from limestone, gypsum, clay, silica, and iron ore. The mines from which such component minerol products ore mined ore listed also under their respective headings—provided thot the mine is within Colifornio.

(7) Colcium compounds refer to moteriols exclusive of limestone for cement ond lime.

EXPLANATORY NOTES iii

I. LIST OF CALIFORNIA MINERAL PRODUCERS 1
An alphabetical list af the names and addresses af mine owners that were active in Califarnia during 1981.

II. LIST OF ACTIVE MINES IN CALIFORNIA BY COMMODITY 11
An alphabetical list af the active mines in Califarnia by cammodity. Entries are grauped by cammadity and listed in alphabetical order by caunty. Each entry gives the name af the mine, its lacatian in degrees latitude and longitude, and the name and mailing address af the operatar.
